-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 02 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

### DETAILED ACTION

1. Upon further consideration, a new grounds of rejection is made in view of Uno U.S. Patent No. 6,437,947. Therefore, the finality of the Office action mailed on August 3, 2005 has been withdrawn. Rejections based on the newly cited reference follow.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 31, 32, 35, and 42-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Uno U.S. Patent No. 6,437,947.

Regarding claim 31, Uno discloses a data storage device comprising a rotating disc assembly (Fig. 14) comprising a disc surface (100), a write transducer (WH) in operable transducing relationship to the disc surface a plurality of adjacent data tracks on the disc surface (Figs. 5-7), a first region (A, Fig. 5) comprising a subset of the adjacent data tracks disposed at a track-to-track spacing such that the write transducer at least partially overlaps a track with an adjacent track and a second region (B, Fig. 6) comprising a subset of the adjacent data tracks, wherein the second region does not contain any of the adjacent data tracks of the first region (column 9, line 51 through column 10, line 4), and a guard band (DS) separating the first region and the second region (column 10, lines 5-17).

Art Unit: 2651

Regarding claim 32, Cameron discloses a data storage device further comprising data written to a first track ( $T_n$ ) of the first region and data written to a second track ( $T_{n+1}$ ) adjacent to the first track, wherein the write transducer is moved in a first radial direction between the first and second tracks such that the data written to the first track is encroached (see OL area, Fig. 5) only on one side by the data written to the second track (column 9, lines 56-66).

Regarding claim 35, Uno discloses a data storage device further comprising sequential data stored on tracks in the first region (column 9, lines 40-50).

Regarding claims 42-44, Uno discloses a data storage device wherein the guard band (DS) further comprises a track which is located between the first region and second region (see Figures 5 and 6). Furthermore, it is considered that Uno discloses a guard band is located in every track in the first and second regions which separate each subsequent track, therefore it is considered that a guard band is located between the first region and the second region as well as the last track of the first region (see Figures 5 and 6).

#### ***Allowable Subject Matter***

4. Claim 33 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2651

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
